Re: Modeling of Air Emissions
Historical Arsenic Operations
Asarco Globe Plant Site

Dear Celia:

On behalf of ASARCO Incorporated, EnviroGroup Limited is pleased to submit the enclosed document, providing a summary of historical arsenic operations conducted at the Globe Plant. This information provides a basis for modeling of historic arsenic air emissions in a manner similar to that for lead, as described in the Air Quality Modeling Protocol documents provided to you on October 22, 1997 and March 6, 1998.

Please note that all of the historic Globe Plant drawings provided in Attachment A have already been provided to the State.

Please call me if you have any questions.

Sincerely,
EnviroGroup Limited

David J. Folkes, P.E.
Principal
